ANGELOS GRIGORIU

Front-End Web Developer

SUMMARY

From the moment I created the first "div" on my first website, I knew I was hooked into the world of web development. But web development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality web applications. What started with a simple "div element" has become a full-fledged passion that only gets more exciting as time goes by.

SKILLS

- HTML5
- CSS3
- JavaScript

- React
- Git
- Material-UI

PERSONAL PROJECTS

IP Address Tracker, View code / View Live
(If the app is not loading, please turn off the adblocker for the webapp.)
- Project uses 2 APIs.
- Fetching details on input submit and geolocating via the coordinates.
- If input was submitted as empty or incorrect it will take your IP address and display the data.

Built With:
- React
- Material-UI

Portfolio Website, View code / View live
- The carousel is using AnimatePresence from Framer-Motion, the component is tricked by using a page state to use the sliding animation on every click and setting the direction to 1 for a slide to the left and –1 to the right.
- EmailJS is used for the form submission.

Built With:
- React
- Material-UI
- Framer-Motion

Sword Shop, View code / View live
(App is hosted on Heroku, please give it some time to load.)
- The app is using createContext to preserve the items in the cart between re-renders.
- Regex usage to search the price and slice only the first 2 digits after the period.
- Set usage for removing duplicate titles and creating different categories for filtering dynamically.

Built With:
- React
- Material-UI
